

## PET/ PP Wide Mouth Containers

Wide mouth containers are widely used for food containers, toys, drink powders and many other applications. Traditionally, most of them are made of glass and consumers often complain about their heavy weight, especially for large size products.

To satisfy consumers' desire for lighter packaging, many brand owners shift their packaging from glass to PET/ PP containers. Reduction in weight also leads to reduction of transportation cost & carbon impact in the logistics chain.

With more than 17 years experience on **Reheat Stretch Blow Moulding (RSBM) Machines**, **W E I L L I** has successfully assisted their customers to develop a wide variety of jars in different sizes & shapes for various applications.

### Advantages:

#### Light Weight

Plastic containers reduce both the material and transportation cost.

#### Easy Access

Wide mouth allows consumers to access the content inside and clean the jar easily.

#### Multi-Functional

Wide mouth jars are not only used as food containers, but also for toys, paint, drink powders & pharmaceuticals.

### Expertise:

#### Wide Bottle Neck

Jars with up to 190 mm neck diameter can be produced on **W E I L L I** machines.

#### Innovative Design

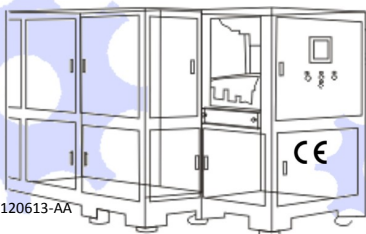

**W E I L L I** is experienced in helping clients to develop jars with special design and applications.

#### Turnkey Solution

**W E I L L I** also provide recommendations for bottle & preform design and auxiliary equipment!
