

REVOLUTION OF PLASTIC PACKAGING

Hong Kong / May 2013 / Wei Li Newsletter 2013 / en/ --

WEI LI has committed to the development of 2 stage Reheat Stretch Blow Moulding machine for PET bottle production since 1995. With stable quality and professional after-sales service, their machines have been exported to all around the world. **WEI LI** was not satisfied with the PET market, they also developed their machines for many different kinds of material, such as **RPET, PP, PC, PMMA, AS, PS, MS, SAN, PLA, PA, PCTG, PES, PPSU, etc..**

Steps **Forward** to the new century

Stepping into the new century, people have higher expectations and social awareness on plastic products. Consumers and suppliers are no longer satisfied with PET containers. They have been looking for plastic products that are more **sustainable, reusable, and recyclable, but also low-cost and food-safe** at the same time.

Features of PP Bottles

- BPA-Free
- Microwave-able
- Hot-Fill Enabled
- Good Moisture Barrier
- Reusable & Recyclable
- Improved Heat Insulation

Applications of PP Bottles

- Sports bottle
- Baby feeding bottle
- Fridge bottle
- Hot-Fill bottle
- Household container
- Reusable Eco bottle

In Chinaplas 2013, **WEI LI** demonstrates the possibilities of PP bottles by serving with hot-fill Chinese herbal tea.

Q find **WEI LI** at **HALL 6.1 C21**

Clarified PP Century

PP bottle has long been known for its difficulties in production and poor clarity. In general perception, PP bottles are milky opaque baby bottles.

WEI LI embraces challenges, and explored a new chapter of PP bottles. The successful development of **WEI LI**'s MP stretch blow moulding machine serie allows possibilities in clarified PP bottle production in both **single** or **multiple cavity**.

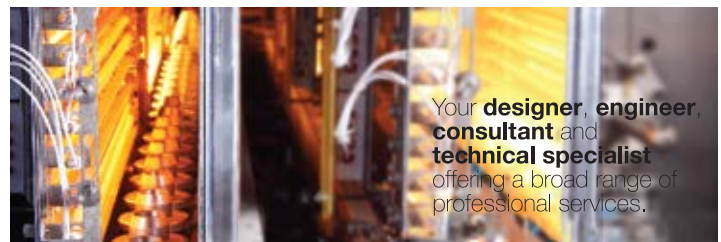

WEI LI is proud of the adaptation of PP production in Reheat Stretch Blow Moulding machines, as well as significant improvement in **production stability**. The **glossy and clear appearance** of PP bottles produced are unbelievably impressive, even compared to PET.

REOWNED TECHNOLOGY & EXPERIENCE

Motivated by the success on clients' product development and business expansion with **WEI LI**'s machines, **WEI LI** is glad to support customers to develop new products and brands.

For those who has less experience in stretch blow moulding processing, **WEI LI** conveys their experience & knowhow as a turn-key solution. The full range of support and services enable an easy development of products with minimum investment and risk.

Turnkey Solutions

Comprehensive Feasibility Study
Experienced Mould Production
One-Stop Sourcing & Matching
All-Round Trial Test Service
On-site Technical Support
Technical Preform Design
Sufficient Spare Part

Sustainable RSBM Machinery

SAVE Space

Reduce Wastage
& Cost

Reduce Electricity
Consumption

Control Carbon
Footprint

Allow Recycling

SAVE ManPower

REVOLUTION & SUSTAINABILITY

Sustainable solutions pave the way for a greener world. In its effort to provide the green solution, **WEI LI** has invested immense efforts in evaluating their machines. It believes enthusiasm and innovation are the drivers for the success, enabling a new environmental and economic solution to partners and customers.

Economically, Socially and Environmentally, customers and the society all benefit from the revolution of **WEI LI** on RSBM Machinery.

Innovative Design in a **Practical** Way

Your Reliable Partner for Size Reduction & Recycling

CE conformity

Discover more at <http://www.aglplastics.com>

WEI LI and **AGL** endeavour to all green solutions in plastic industry. As conventional plastics no longer fulfill the social and eco responsibilities. Along with recycling, biodegradable plastics is one of the best solutions to solve the problem.

EcoPure is the advanced organic plastic additive, which speeds up biodegradation of plastic products in landfill condition. Similar to standard color masterbatch, **EcoPure** can be applied to common plastics, e.g. PE, PC, PP, PET, PS, etc...

Instead of centuries, **EcoPure** helps your products biodegrades in years.

REDUCTION IN SIZE OF PLASTIC

Only the best is good enough. **WEI LI** has been emphasising the importance of quality for years. With excellent experience in plastic industry, **WEI LI** has developed with its sister company - **AGL Plastics Inc.**, committing to plastic recycling and pulverizers. The pulverizer assists in plastic scraps grinding as well as size reduction of virgin resins for better mixing and recycling.

In order to grow mutually with friends and partners, **ambient and cryogenic milling & pulverization services** are available for **LDPE/LLDPE/HDPE, PVC, PS, PC, PA, PP, EVA, POM, PET, ABS, PTFE, TPU, PES AS, PMMA, Engineering Polymer, UHMWHDPE, Woodplastic, etc..**

Features of AGL Pulverizer

- Simple** One-Axis Disc Alignment
- Enhanced** Efficiency & Capacity
- Economic** Disc Spare-parts
- Endurable** Performance
- High-Quality** Powder
- Contamination-Free**
- Space Saving**

REVOLUTION OF ECO PLASTICS

Organic Biodegradable Plastic Additive
Accelerates Biodegradation of Plastics
in a Microbial Active Environment.

RELIABLE Partner in over 60 countries

Quality Production
in both PP and PET Bottles

WEI LI has been developing under international guidelines for quality management and quality control system. With stable quality and professional after-sales service, machines have been exported to all around the world. There are now partners and clients in over 60 countries around the world.

Supported by its own production plant in China, marketing office in Hong Kong and overseas sales representatives, **WEI LI** becomes the reliable **supporting centre** and **R&D department** for many overseas partners & clients.

Forward to the K

As a regular exhibitor in all around the world, **WEI LI** are excited to meet you all at K Fair 2013 in Germany. **WEI LI** keeps on **moving forward** to demonstrate their best to the world. Along with the most innovative application and advanced technology, **WEI LI** promised to provide you with new insights in designs and application of plastics machinery.

Let's be **inspired**! **WEI LI** looks forward to meeting you all there!
